Mansfield Today

Local Mansfield resident John Duckett is recovering after a revolutionary operation at Kings Mill Hospital. John had a problem with his _____ and he was diagnosed as having a _____

heart _____. Fortunately for John medical technology has advanced in the past 100 years. Staff at Kings Mill had the very best in modern technology. When John's condition was first suspected the consultant used some of the most advanced technology on him. John was tested with a _____ which the doctor used to _____ to his heart. Then the doctor sent him for an _____ scan. This is a safe way to _____ inside the body and uses special _____ waves. Once his condition was diagnosed, John was able to receive treatment to help make him better. The treatment included _____ using an _____ machine so the doctors could _____ what they were doing. Speaking about the consultants at Kings Mill Hospital, John said "They were _____. They really knew their medicine and I'm grateful for them making me _____".
